

# IdleTrencher Wiki

---

## Welcome to IdleTrencher

Make your token wallet fun and cute!

### Why IdleTrencher?

Let's be honest — watching crypto charts can be stressful. The constant price swings, the FOMO, the red days that never seem to end...

**What if checking your portfolio could actually be... relaxing?**

**IdleTrencher** brings visual, gamified creativity to crypto. Instead of staring at boring numbers and anxiety-inducing charts, your tokens come to life as adorable 3D characters that react to the market in real-time.

- **Token going up?** Your character celebrates with a happy dance!
- **Having a rough day?** They're doing sit-ups, working hard to recover.
- **Market's chill?** They're just taking a peaceful stroll.

### The Vibe

IdleTrencher is designed for **crypto enjoyers**. Whether you're a diamond-handed holder or just curious about your friend's portfolio, we want to make the experience:

- **Fun** — An idle game where your tokens become characters
- **Relaxing** — No more chart anxiety, just cute characters vibing
- **Engaging** — Gamified leveling, skins, and leaderboards

*"I used to check my portfolio 50 times a day out of stress. Now I check it 50 times a day because I want to see my little guys dance." — Probably someone*

### Getting Started

1. **Connect your wallet** — We support Phantom, Solflare, and other Solana wallets
2. **Watch your tokens come alive** — Your top holdings become 3D partners
3. **Level them up** — Just by holding, your partners gain EXP and grow stronger

Ready to meet your partners? **Launch App** → <https://idletrencher.vercel.app>

---

## Gameplay

### Your Home Base

When you connect your wallet, your top token holdings transform into **Partners** — cute 3D characters that live in your personal plaza.

### Meet Your Partners

Each token in your wallet becomes a partner character. They're not just standing there looking pretty — they actually **react to the market** in real-time!

Market Condition	Character Behavior
Price going up	Happy dance & celebration
Price going down	Doing sit-ups (working hard!)
Price stable	Peaceful walking around

Click on any partner to chat with them. They'll tell you:

- How they're doing today (24h price change)
- Their HP status (based on your entry point)
- How long you've been together

*Who knows? Maybe in the future, they'll have even more stories to share with you...*

## HP Bars — Your Visual Progress

Every partner has an **HP bar** that shows how your investment is doing compared to your base value.

- **Green bars** = You're in profit!
- **Red bars** = Currently below your base value

**Pro tip:** You can **Edit Base Value** to set your own entry point. This is useful if you want to track gains from a specific price, not just when you first connected.

## EXP & Levels

Your partners gain **experience points (EXP)** just by being in your portfolio. The longer you hold, the stronger they become!

### How EXP Works

- **1 day holding** = 1 EXP (roughly)
- **Bonus EXP:** When your token is pumping (price increasing), you gain bonus hours toward EXP
- **Max Level:** 60 (achieved after about 1 year of holding)

**Warning:** If a partner is removed from your portfolio — whether you sold the token or its value dropped below other holdings — their EXP will be reset to zero.

*The journey of a thousand miles begins with a single day of holding. Or something like that.*

## The Interface

Here's what you'll see on your home screen:

- **3D Plaza** — Your partners walking, dancing, or exercising
- **Wallet Value** — Your total portfolio value at a glance
- **Partner Count** — How many tokens you're tracking
- **Refresh Button** — Update your portfolio data

The number of partners you can have depends on how much **\$IDLE** token you hold.

## Explore Other Wallets

Ever wondered what your favorite crypto influencer is actually holding? Or maybe you want to check out a friend's portfolio in a fun way?

**Explore mode** lets you peek into any public Solana wallet and see their tokens as 3D characters!

## How It Works

1. Click the **Explore** button (magnifying glass icon)
2. Paste any Solana wallet address
3. Watch their portfolio come alive!

## What You Can See

When exploring someone else's wallet, you'll see:

- Their token partners as 3D characters
- Approximate portfolio value
- How each token is performing (dancing vs exercising)

**Privacy First:** We only show **public blockchain data** — the same information anyone can see on a block explorer, just way more fun to look at. No private data, no tracking.

## Fun Use Cases

**Alpha Hunting:** See what smart money is holding. If their characters are all dancing, maybe they're onto something...

**Show Friends:** Share your wallet address and let friends see your portfolio in style. Way cooler than sending a screenshot!

**Learning:** New to crypto? Explore wallets of experienced traders to see what a diversified portfolio looks like.

---

## Character Skins

*Coming Soon: This feature is currently in development.*

### What Are Skins?

Right now, your partners are assigned random villager-style characters. But soon, you'll be able to **customize their appearance** with unique skins!

### Planned Features

#### Skin Collection:

- **Basic Skins** — Free for everyone (villagers, adventurers)
- **Premium Skins** — Knights, mages, archers, and more
- **Legendary Skins** — Ultra-rare designs for dedicated holders

#### How to Unlock:

Method	Skins
Level Up	Reach certain levels to unlock skins
Hold \$IDLE	Exclusive skins for token holders
Contribute	Artists who create skins get free access

**Assign to Favorites:** Once unlocked, you can assign any skin to your favorite tokens. Imagine your main bag rocking a legendary knight skin while surrounded by a squad of mages!

### For Artists: Create Your Own Skin!

We're building IdleTrencher as a community project, and we'd love your contributions.

If you're a **3D artist**, you can create character skins that get added to the game. Contributors automatically get to use their own creations!

**Requirements:**

- Rigged 3D model compatible with our animation system
- Multiple animation states (walk, run, celebrate, exercise)
- Family-friendly design

*"Fashion is the armor to survive the reality of everyday life." — Bill Cunningham (and also crypto)*

---

## Global Leaderboard

*Coming Soon: This feature is currently in development.*

### The Ultimate Flex

Sure, anyone can buy a token. But trading skills, sharp vision, and the ability to hold — it takes all three to be a true master. The leaderboard will showcase the most skilled Trenchers in the IdleTrencher community.

### How Rankings Work

We're designing the leaderboard to filter for the strongest Trenchers:

- Hold \$IDLE to gain EXP boost advantages
- More partners + higher levels = higher total score
- Different asset tiers compete separately — small and big holders in their own leagues

### Why a Leaderboard?

Let's be real — crypto can be competitive. Instead of competing on who can trade the fastest or who got the earliest insider info, we want to celebrate a different kind of success:

**The ability to balance holding and active trading.**

It sounds simple, but in a world of 100x memecoins and daily rugs, being a consistent holder is its own achievement.

*"The stock market is a device for transferring money from the impatient to the patient." — Warren Buffett*

---

## \$IDLE Token

The **\$IDLE** token powers the IdleTrencher ecosystem. Hold it to unlock more features and support the project!

### Token Info

Property	Value
<b>Name</b>	IDLE
<b>Chain</b>	Solana
<b>Launch</b>	PumpFun
<b>Contract</b>	TBD

### Distribution

- **90%** — Public circulation via PumpFun
- **10%** — Team allocation for hackathon and development

## Utility

### More Partners

The more \$IDLE you hold, the more token partners you can have:

\$IDLE Held	Partner Slots
0	3 partners (free tier)
10,000	4 partners
20,000	5 partners
30,000	6 partners
...	+1 per 10k
70,000+	10 partners (max)

### Premium Features

Future \$IDLE utilities may include:

- Exclusive skin unlocks
- Priority access to new features
- Governance voting rights

## Fair Launch

IdleTrencher was built during a 2026 hackathon with the goal of making crypto more fun for everyone. We're launching \$IDLE through PumpFun to ensure a fair, transparent distribution.

**No presale. No insider deals. Just vibes.**

---

## Community

IdleTrencher is more than just an app — it's a growing community of crypto enthusiasts who believe watching your portfolio should be fun, not stressful.

## Connect With Us

### Social Media

Platform	Link
<b>Creator</b>	@h2crypto_eth (Twitter/X)
<b>Official X</b>	TBD

### Open Source

IdleTrencher is open source! Check out the code, report bugs, or contribute:

- **GitHub:** [github.com/sonyschan/TrencherRPG](https://github.com/sonyschan/TrencherRPG)
- **Issues:** Report bugs on GitHub

## Contribute 3D Characters

We're actively looking for **3D artists** to help expand our character collection!

### Why Contribute?

- Your creations become part of the game
- You automatically get to use your own skins
- Credit in the game and wiki
- Join a fun community project

### Character Requirements

Requirement	Details
<b>Format</b>	GLTF/GLB format
<b>Rigging</b>	Compatible with Mixamo or similar
<b>Animations</b>	Walk, Run, Celebrate, Sit-ups/Exercise
<b>Style</b>	Low-poly, stylized (matching current art style)
<b>Content</b>	Family-friendly, no offensive imagery

### How to Submit

1. **Fork** the GitHub repo
2. Add your character to `/public/assets/characters/`
3. Include a preview image
4. **Submit a Pull Request** with:
  - Character name
  - Brief description
  - Your credit name (or stay anonymous)

We'll review submissions and integrate approved characters into the game!

## Community Guidelines

We want IdleTrencher to be welcoming for everyone:

- Be respectful and supportive
- Share your partner screenshots!
- Suggest features and improvements
- No financial advice — we're just here to have fun

## Roadmap

Here's what we're working on:

- ☐ Custom skins system
- ☐ Global leaderboards
- ☐ Wallet profiles
- ☐ More partner animations

- ☐ Mobile app (maybe?)
